Maastricht has something new! Discover the deepest secrets of St. Pietersberg hill on a kick scooter together with an experienced guide.

The kick scooter is the ideal way to cover large distances in the caves. You'll be able to see places you wouldn't normally get to on a normal tour. The guide will take you on a unique trip to learn about this extraordinary subterranean world. Enjoy fascinating stories full of facts and anecdotes and soak up the authentic and mysterious ambience of the marl caves. This is a huge network of man-made corridors. The labyrinth once had 20,000 passageways covering a total of 200 kilometres. The labyrinth currently has 8,000 passageways, measuring a total of 80 kilometres in length. There is no electricity, no sound, no mobile phone signal, and no lighting, except for the light emitted by headlamps. This is an exciting and surprising excursion with a real sense of momentum!
